As depicted in the seal for National Security Agency, the 1988 top secret program at Rockwell International that I worked on which marked my family bloodline having the oldest, rarest, and most complete set of haplogroups as yielding the unbreakable encryption scheme affects the entire nuclear arsenal, drone program, state-of-the-art missile systems, directed energy weapon systems, satellite-powered psychotronic communications to nuclear submarines and among military intelligence agencies, and 'tradcrafft' technology such as nano-powered Remote Neural Monitor (RNM) Viewers and voice/larynx descramblers for 'the fine line' of our military oversight, the Joint Chiefs of Staff, and is the all-time penultimate weapon systems component of all-time that helped win the Cold War in 1991.
